### Summary of Experience

Craig has over 40 years' experience in the planning and design of infrastructure projects, gained whilst working in Australia and New Zealand. The last 19 years has included specialisation in traffic and transport projects.

### Key Skills include:

- Planning and Design of Urban Transport Infrastructure
- Traffic Impact Assessment
- Corridor studies, traffic studies and scheme assessment
- Walk and Cycle Planning and Design
- Development Assessment

### Signature Projects:

**Chapel Road/Maggs Hill Road - Corridor Planning** – Project management, traffic impact assessment, and reporting for the upgrade of Chapel Road, Maggs Hill Road and Main Street including horizontal and vertical alignment, intersection design, and stormwater.

**Toowoomba Regional Council Development Assessment.** – Provision of consultancy services to the Development Services Branch. Tasks included the engineering assessment of MCU, RAL and OW development applications, preparation of information requests, preparation of decision notices, negotiation of development outcomes, attendance at council meetings, and preparation of technical reports including traffic assessments.

**Cycling Program Assessment** – Technical Assessor for the Cycle Network Local Government Grants Program including application assessment, design review, project completion and weekly meetings with TMR.

**Gladstone LNG Project (Santos)** – Project manager and technical review of the traffic and transport impact assessment component of an EIA for a major mining operation involving the capture of coal seam gas from the Surat and Bowen Basin gas fields, transport to Gladstone, and processing prior to export.

**Mackay – Northern Beaches Shopping Centre** – Masterplan advice, project management and technical input to a traffic impact assessment for a 42,000m<sup>2</sup> shopping centre expansion.

**Hervey Bay – Pialba-Burrum Heads Rd Corridor Study** – Project management and technical input to state road planning study identifying access points for new road connections, intersection improvements and a four-lane layout.

**Brisbane – South Bank Redevelopment** – Project management of the preliminary and final design associated with the realignment of Grey Street within the South Bank Precinct.
